

## **Industry support required for the adoption of international standards for generic customer cabling for information technology**

The current Australian and New Zealand standard AS/NZS 3080 for generic customer cabling is based on the international standard ISO/IEC 11801 which is currently under revision.

With ISO/IEC 11801 undergoing a major revision the Australian and New Zealand Standard AS/NZS3080 needs to be updated in line with ISO/IEC 11801 to remain relevant.

The ISO/IEC 11801-x series is currently at Final Draft stage and is expected to be finalised on 15<sup>th</sup> September 2017.

ISO/IEC 11801 is planned to be broken down into six parts and additionally a number of standards, technical specifications and technical reports have been or are under development.

As such a project proposal has been sent to Standards Australia to adopt these standards, technical specifications and technical reports within Australia and New Zealand.

As part of the Standards Australia project prioritisation submission, Standards Australia looks for evidence of broader stakeholder support as part of their assessment.

The support is required to come in the form of a letter on company letterhead or a company email.

The Australian Standard Committee CT-001 endorsed the adoption of the documents at a meeting in Sydney on the 4<sup>th</sup> September 2017 however broader stakeholder support as always would be appreciated and beneficial to the case.

If your organisation is in a position to support this body of work could you, please send a letter or email of support to [office@vti.net.au](mailto:office@vti.net.au) in order for your support to be included with the submission to Standards Australia.

The submission included the recommendation for the adoption of the following documents:

1. ISO/IEC 11801-1 Information technology -- Generic cabling for customer premises -- Part 1: General requirements
2. ISO/IEC 11801-2 Information technology -- Generic cabling for customer premises -- Part 2: Office premises
3. ISO/IEC 11801-3 Information technology -- Generic cabling for customer premises -- Part 3: Industrial premises
4. ISO/IEC 11801-4 Information technology -- Generic cabling for customer premises -- Part 4: Single-tenant homes
5. ISO/IEC 11801-5 Information technology -- Generic cabling for customer premises -- Part 5: Data centres
6. ISO/IEC 11801-6 Information technology -- Generic cabling for customer premises -- Part 6: Distributed building services
7. ISO/IEC 30129 Information technology -- Telecommunications bonding networks for buildings and other structures
8. ISO/IEC TS 29125 Information technology -- Telecommunications cabling requirements for remote powering of terminal equipment
9. ISO/IEC TR 11801-9902 Information technology -- Generic cabling for customer premises -- Part 9902: Specifications for End-to-end link configurations
